 - Big Sister
 - Track
 - Materials
 - Local FreeBSD documents
 - FreeBSD resources via ftp and cvsup

WEB

The image shows a screenshot of a Mozilla Firefox browser window. The title bar reads "Mozilla Firefox". The menu bar includes "File", "Edit", "View", "Go", "Bookmarks", "Tools", and "Help". The address bar shows the URL "http://www.pacnog2.dnsdojo.net/" and a search box containing "proftpd". The browser's toolbar includes icons for back, forward, home, search, and other functions. The page content is as follows:

PACNOG-2 Workshop Materials and resources

[Big Sister](#) - services and network monitoring

[Trac](#) - Wiki and ticket generation

[Materials](#) - Course materials, presentations, worksheets

[FreeBSD webpage](#) - Local copy of the FreeBSD webpage and handbook

At the bottom of the browser window, there is a search bar with the text "Find: apa" and buttons for "Find Next", "Find Previous", "Highlight all", and "Match case". The status bar at the very bottom says "Done".

This is the NOC WIKI for PACNOG 2

This wiki will contain some of the workshop materials and trac will be used to generate trouble tickets.

Please login using your pc# with your pc# as the password.

In settings remember to set your username and password.

To create a New ticket select New ticket, otherwise select view tickets to view an existing ticket.

Welcome to Trac 0.9.5

Trac is a **minimalistic** approach to **web-based** management of **software projects**. Its goal is to simplify effective tracking and handling of software issues, enhancements and overall progress.

All aspects of Trac have been designed with the single goal to **help developers write great software** while **staying out of the way** and imposing as little as possible on a team's established process and culture.

As all Wiki pages, this page is editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. [WikiFormatting](#) will give you a detailed description of available Wiki formatting commands.

["trac-admin yourenvdir initenv"](#) created a new Trac environment, containing a default set of wiki pages and some sample data. This newly created environment also contains [documentation](#) to help you get started with your project.

You can use [trac-admin](#) to configure [Trac](#) to better fit your project, especially in regard to *components*, *versions* and *milestones*.
