The forces driving networking

A complex push-pull between competing/co-operating elements

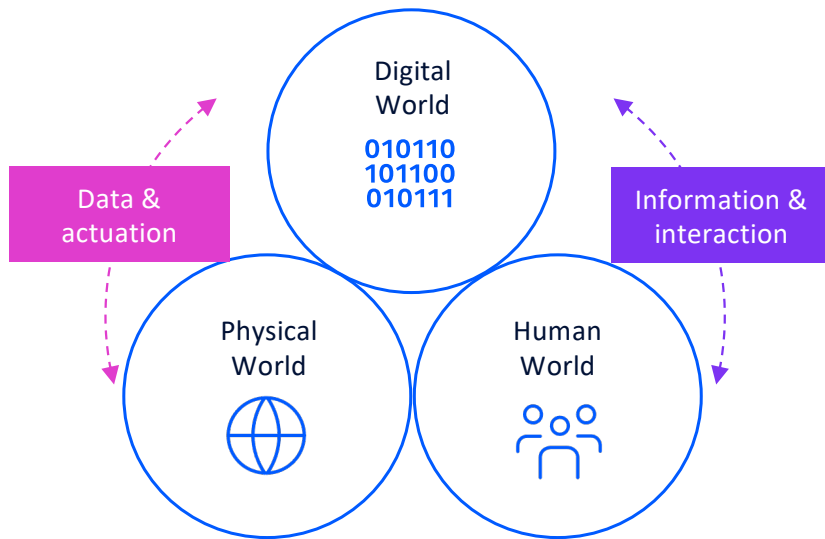

Motivating the evolution
of networks that *sense,*
think & act...

... with ubiquitous AI,
driving the Power of n

Technology in 2030

Connecting the physical, digital and human worlds to meet the needs of 2030

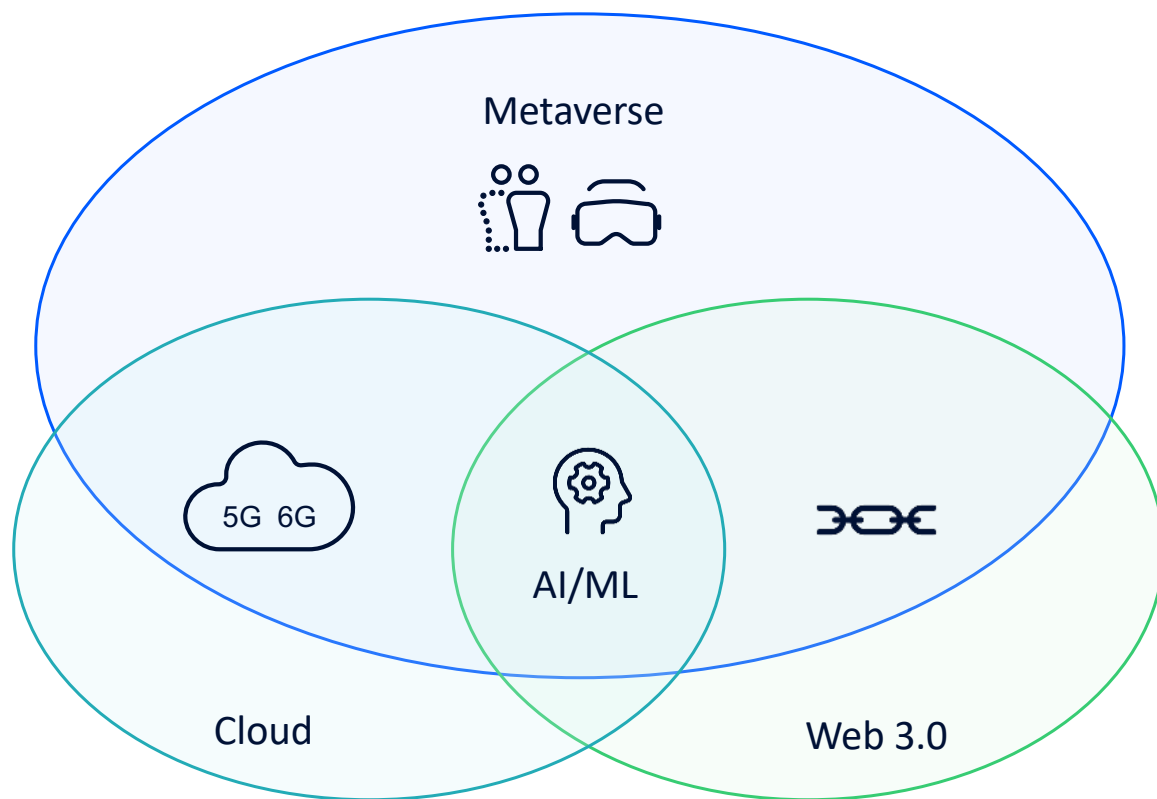

Digital convergence continuously extends the scope of human possibilities

Technology themes shaping the world of 2030

AI is at the center of everything

Metaverse potential value creation
\$5 trillion by 2030.¹

Edge cloud computing opportunity
\$445 billion addressable revenue by 2030.²

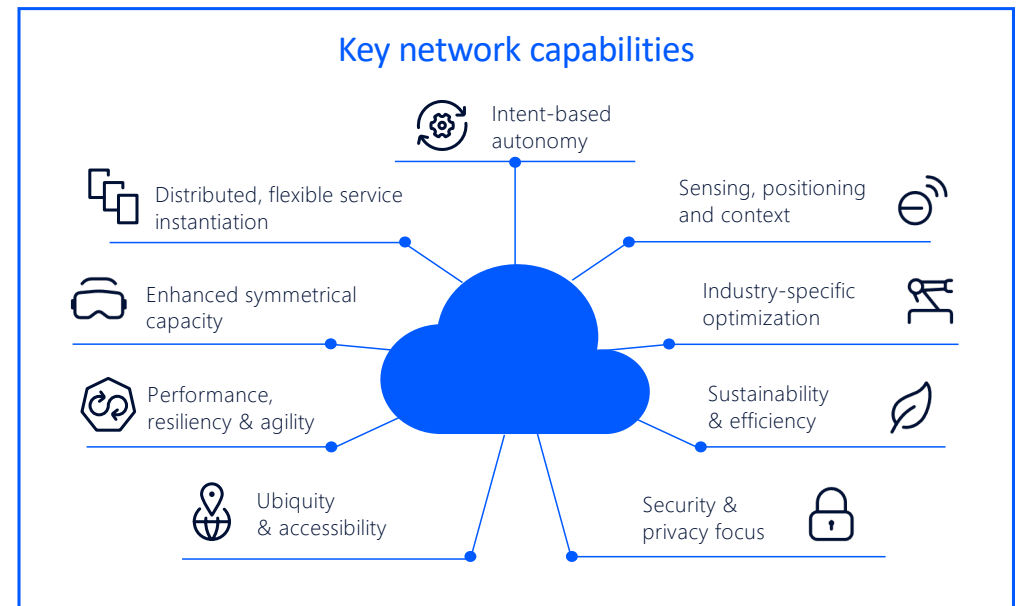

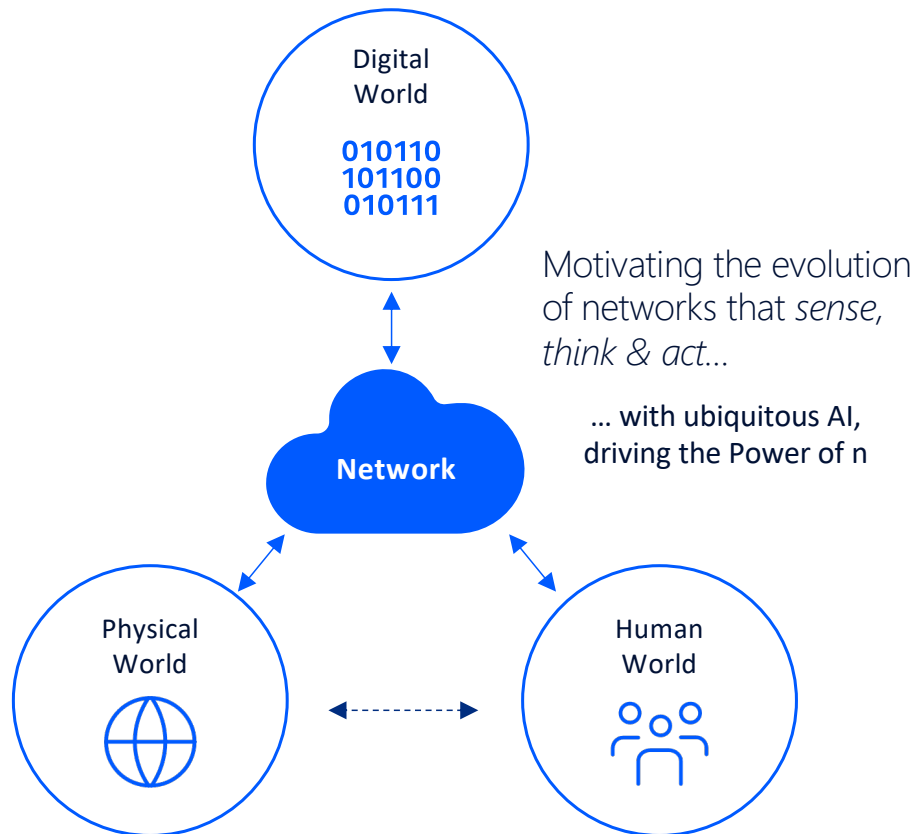

Blockchain market worth **\$508.1 billion** by 2030, with a 62.4% CAGR 2022-30.³

AI total market worth **\$908.7 billion** by 2030, with a 35% CAGR 2022-30.⁴

1 McKinsey, February 2023.
2 STL Partners, December 2022.
3 GlobalData, December 2022.
4 GlobalData, June 2023.

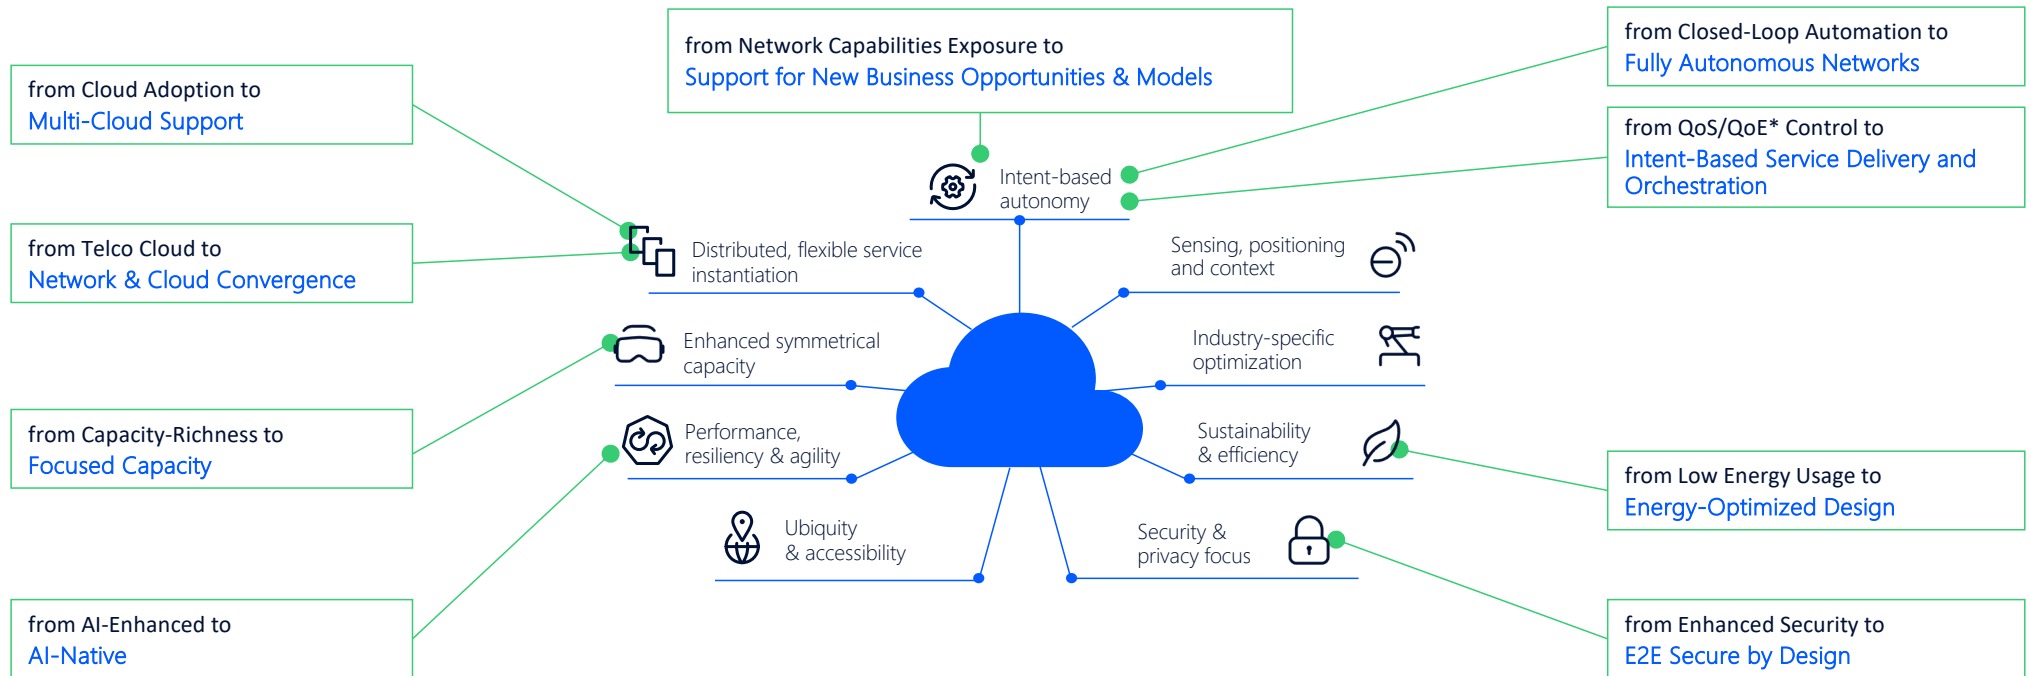

Meeting the challenges, and addressing the needs of 2030

Requires connectivity capabilities taken to the next level

Network evolution & innovation

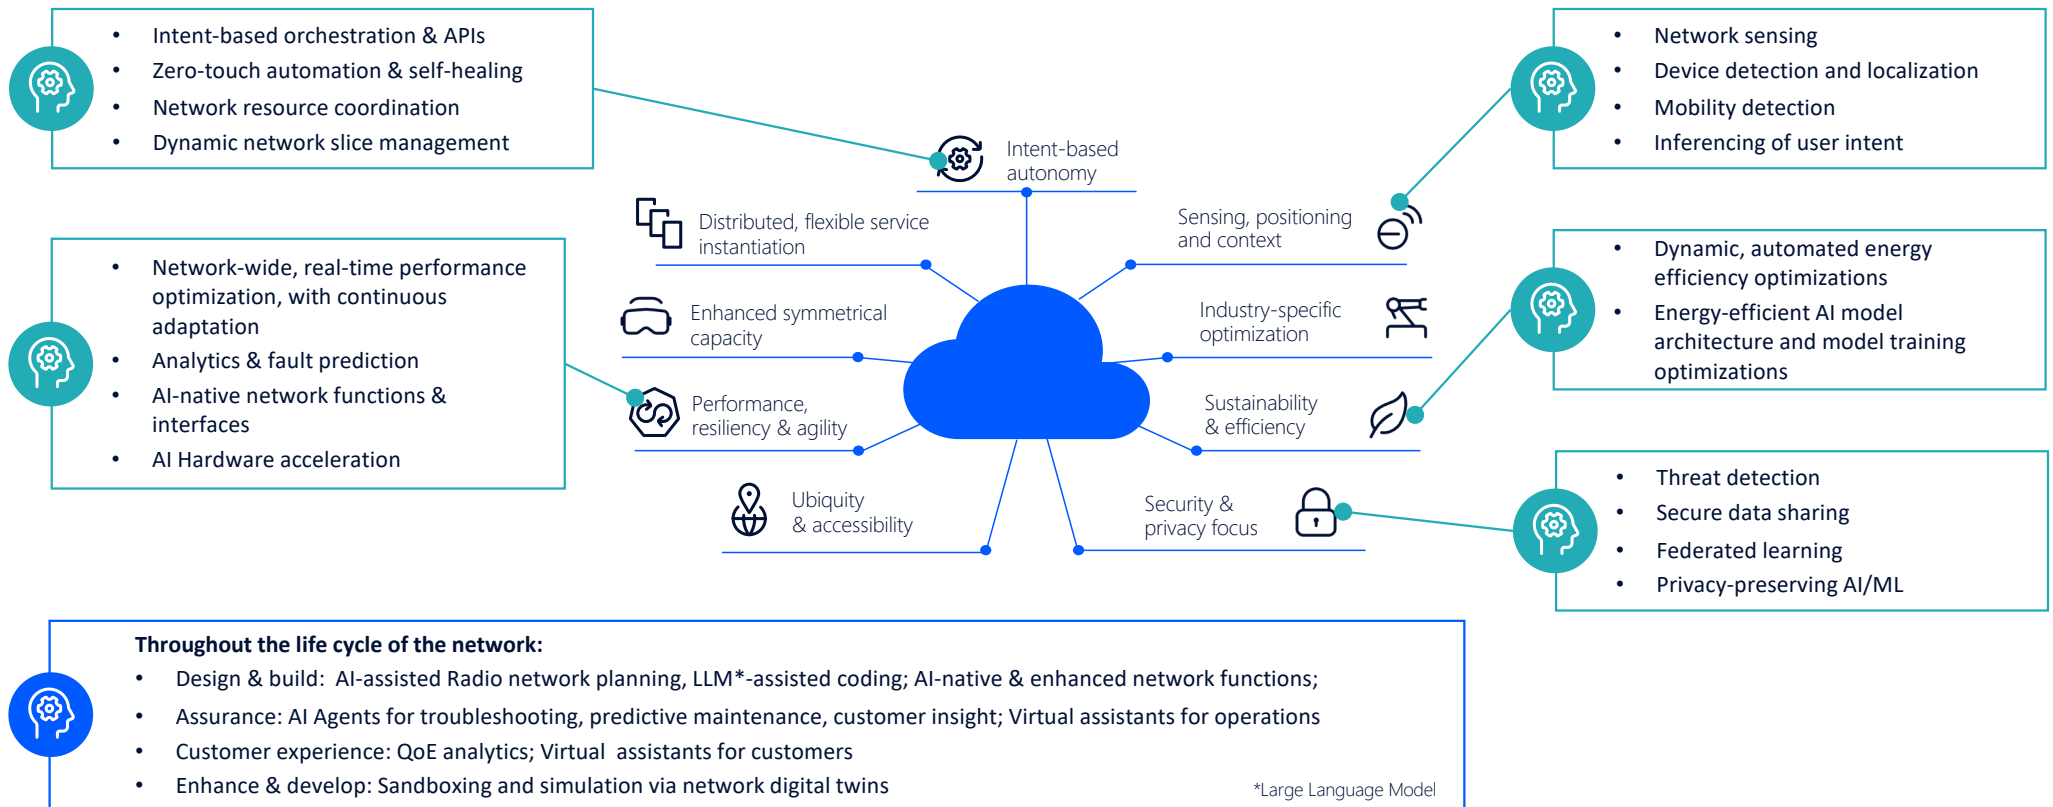

Areas of key focus

*Quality of Service / Quality of Experience

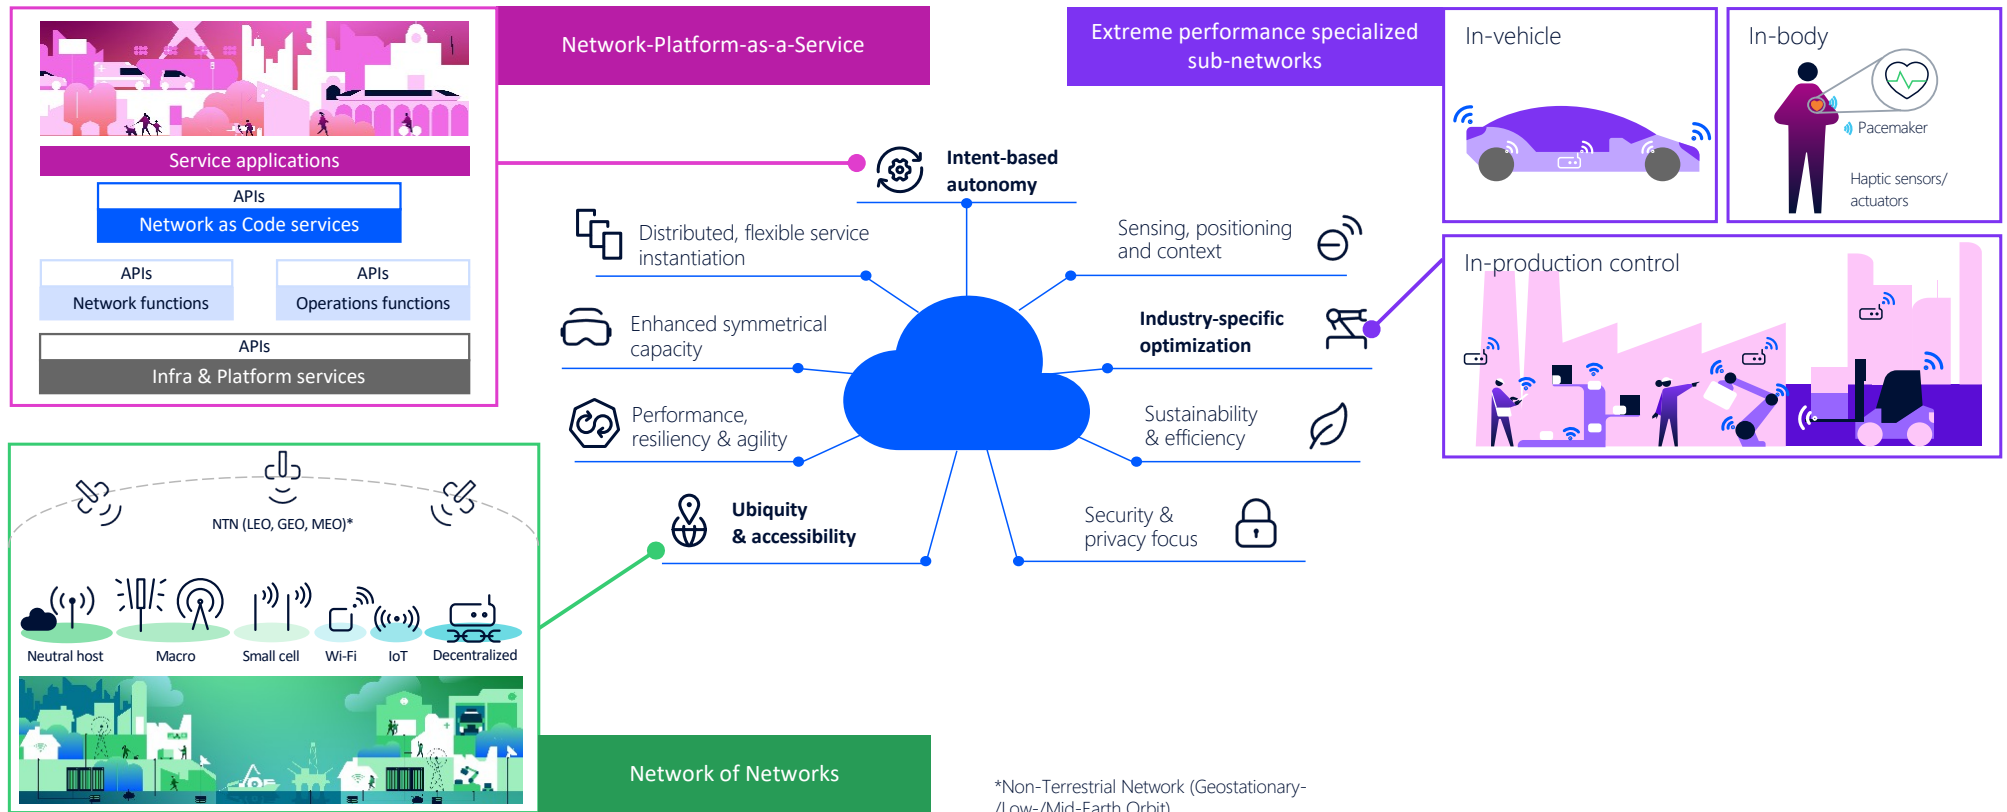

AI is integral to Network Evolution

Ubiquitous, Responsible AI unlocks the transformational potential of networks

Network Building

Network transformation requires new ways of creating and integrating networks

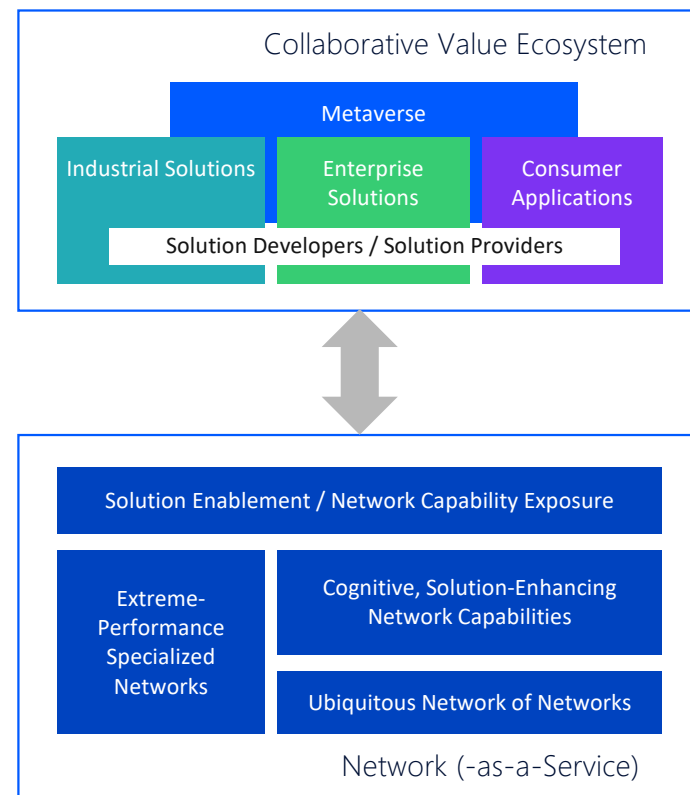

Business ecosystem evolution

Leveraging new network capabilities and decentralized mechanisms

- Rich, open solution ecosystem, driven by collaborative partnership and developer-led innovation & consumability
- Network capabilities leveraged for solution innovation
- Decentralized mechanisms unlock new business interactions and increase trustworthy value exchange
- CSPs increase focus on industrial, enterprise & B2B2C* solutions for growth
- Understanding & harnessing AI's potential becomes essential to success

*Business-to-Business-to-Consumer

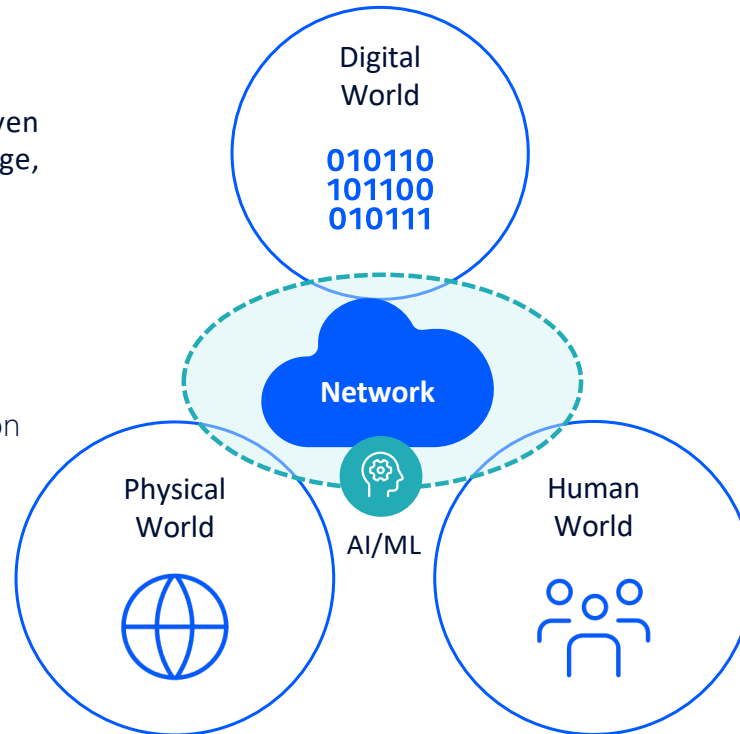

Technology Vision 2030

Summary

Envisioning a world of 2030 driven by rapid and wide-ranging change, with innovation

- addressing new and heightened demands, and
- unlocking the potential of a vibrant, collaborative solution ecosystem

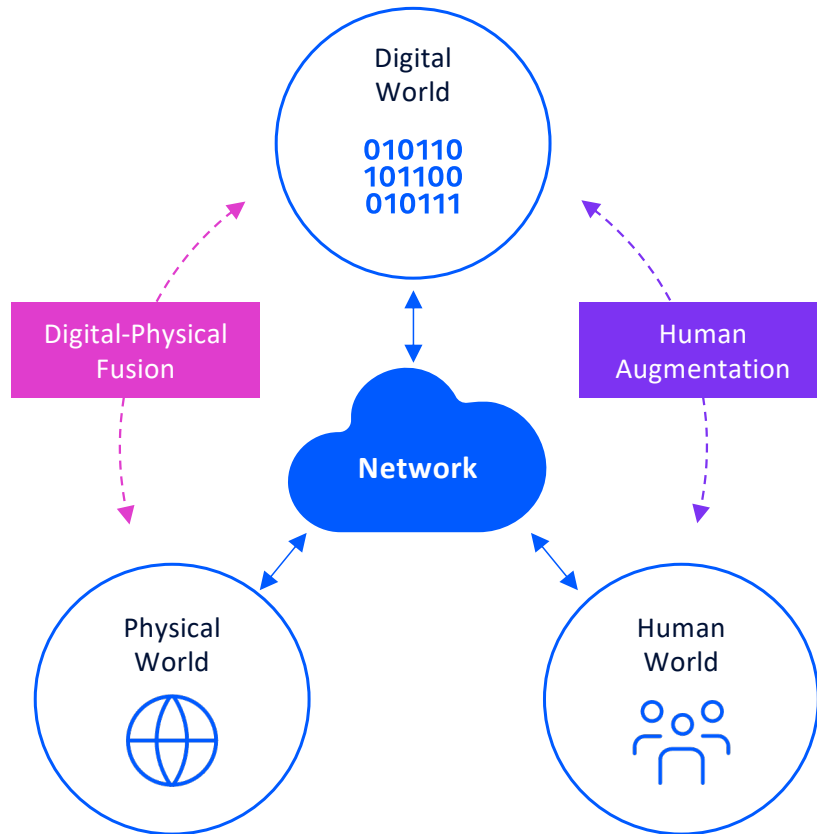

AI-enhanced networks that sense, think and act will be vital to this evolution - connecting the human, physical and digital worlds, to meet the needs and opportunities of 2030

Thematic discussion: **metaverse**

Human Augmentation and Digital-Physical Fusion are the key concepts underpinning how we describe 'the metaverse'

Human Augmentation

Extensions that enable people to interact with and within the digital world

Evolves the digital world from being a source of two-dimensional experiences and information, to a focal point of immersive and productive interaction

Digital-Physical Fusion

Dynamic, connected representations of real-world things in the digital world

Allows the physical world to be replicated, simulated and automated within the digital world - opening doors to a wealth of new possibilities for human benefit.

Revenue opportunities will exhibit different growth dynamics

Industrial metaverse opportunities are already revealing traction

Industrial Metaverse (OT*-centric)

- XR-enabled workforces
- Digital twin enhanced production & condition monitoring

Enterprise Metaverse (IT*-centric)

- Immersive team collaboration
- Digital co-design
- XR-based training & learning

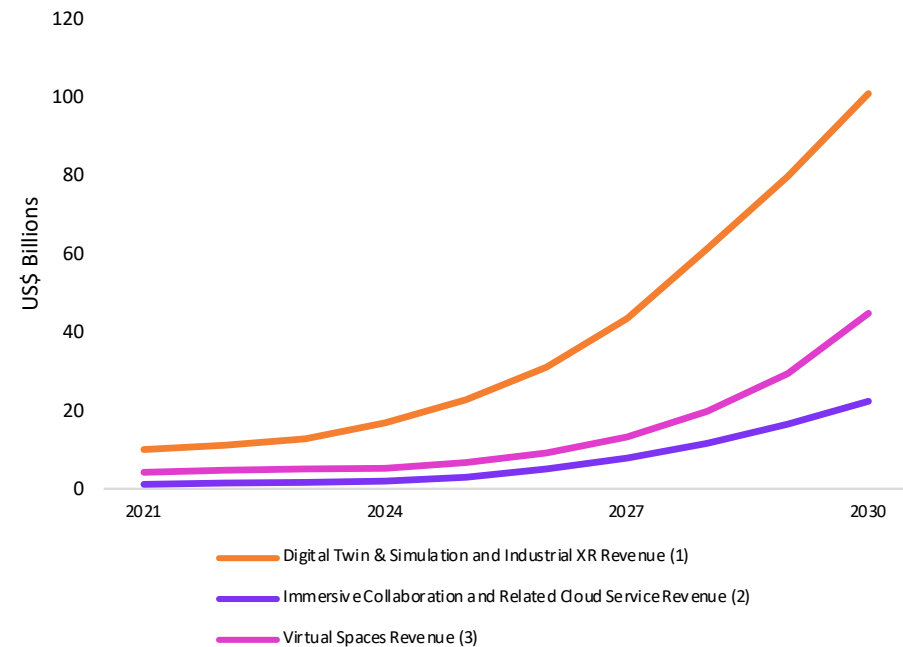

Consumer Metaverse

- Immersive gaming
- XR-enhanced social & retail interaction
- Virtual tourism

* IT: Information Technology | OT: Operational Technology

Metaverse revenue forecast examples (global)

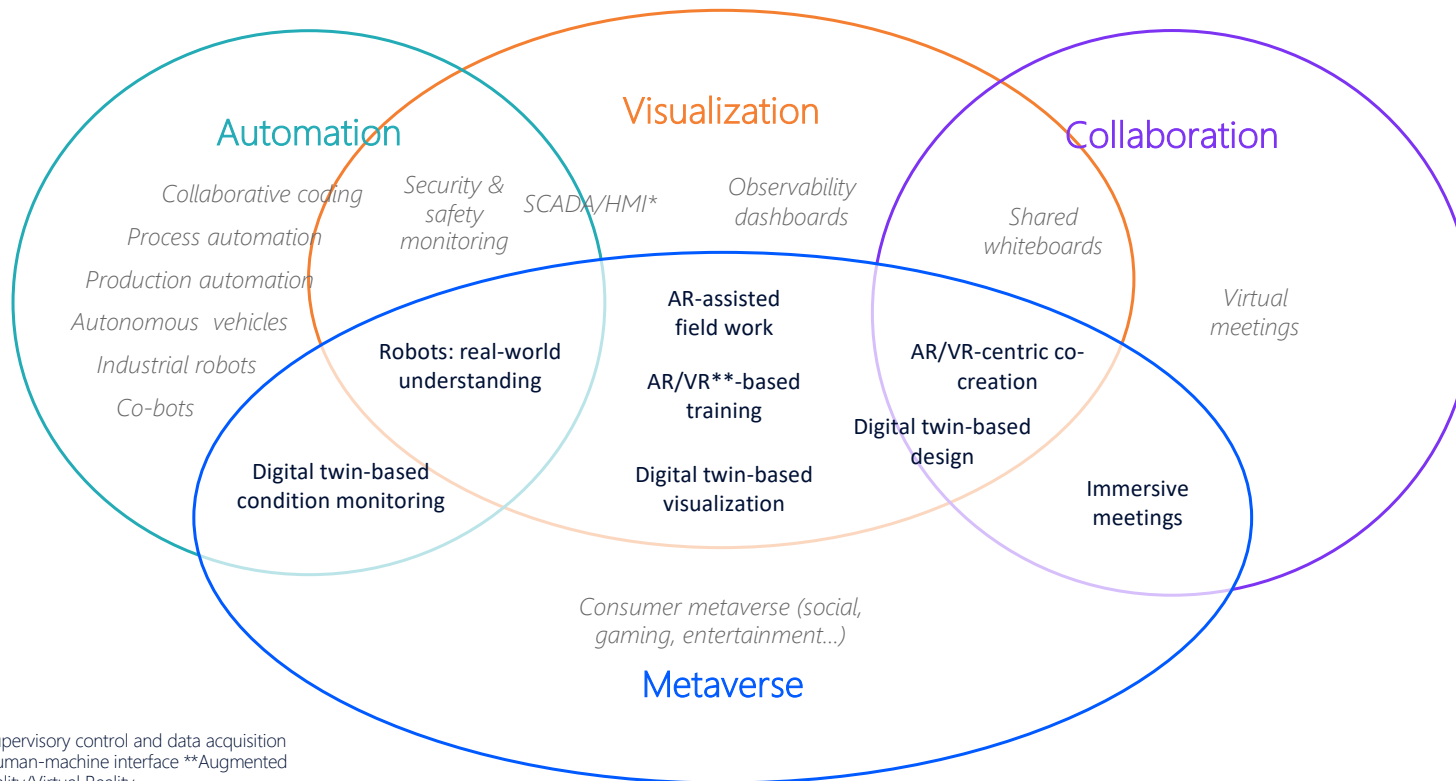

1 ABI Research: The Future of Work, Augmented and Mixed Reality, Virtual Reality Market Data, November 2022

2 ABI Research: Enterprise Metaverse: Future of Work, March 2022

3 ABI Research: 2022 Consumer Metaverse Market Update, June 2022

The metaverse extends business transformation potential

Examples, within established enterprise & industrial solution areas

Digital-Physical Fusion enables automation of real-world objects, systems and processes

Human Augmentation increases perception and understanding, through enhanced interaction & immersion

Key Enablers

- AI & ML
- Networks & Devices
- Data Management

*Supervisory control and data acquisition /Human-machine interface **Augmented Reality/Virtual Reality
